

Cairo 1/1/2011

Dear Clients,

Since our inception in 2007, our focus was to provide financial consultancy services while stressing integrity in all our endeavors. We envisioned a company that fosters long term growth through continued client satisfaction and thus loyalty, a company that has word of mouth as its primary marketing tool, and finally a company that cares about all of its major stakeholders not only its major stockholders.

Our unique selling proposition to our clients has been, since the beginning, to provide our clients with diverse investment solutions while maintaining the high quality service and ensuring equal involvement for all clients regardless of size.

Earlier this year, in our quest to fulfill the potential of our public service role, we chose to harness our expertise to serve the development sector in projects that could benefit from business acumen in their operations and/or research. In 2010, we received our first development assignment from an international non-profit venture capital fund.

Whereas we remain focused on achieving the financial goals of our investment clients, we also continue to pursue the goals of our development sector clients. Keeping this balance will remain our biggest priority as we chose this commitment to define us as business people who accept their responsibilities towards their community.

Thank you and best regards,
